INTRODUCTION

Healthcare is one of the primary objectives of any progressive Nation. In the modern dynamic world, we are facing new and deadly diseases, and struggling to counter them. However, we are trying to find a line of treatment and cure them. But before the treatment, the diagnosis confirms the symptoms and decides the line of treatment. During the Pandemic, we all realized the importance of Diagnosis and testing kits for COVID-19 to counter such deadly diseases. With this recent experience and willingness to contribute to healthcare, so that we can make India Self-reliant in the manufacturing of Testing and Diagnosis kits, we laid down the Foundation of S.A. Medline.

S.A Medline was established in Sep 2021. We are a leading Diagnostic Kit Manufacturer, located in Sahibabad Uttar Pradesh with international standard infrastructure and an innovative atmosphere. We have expertise in Manufacturing and supply of kits as we understand and have competencies to match up with the pace of modernization and advancement of the healthcare sector at the global level. We manufacture a complete range of Diagnostic testing products and kits for the diagnosis of diseases and different research & development purposes.

The objective of incorporating S.A. Medline is to Manufacture and make available highly effective, efficient, affordable, accurate, and user-friendly best quality Diagnostic products. We are committed to creating world-class products- rapid testing kits at a competitive price. The idea is to make testing affordable for people who belong to the marginalised class. Those who find it expensive even they can also go for the testing. We aspire to make Diagnosis or testing so simple, easy, and affordable that an individual can use it itself. We are utilising our expertise and advanced international standards technology to make the best out of it.

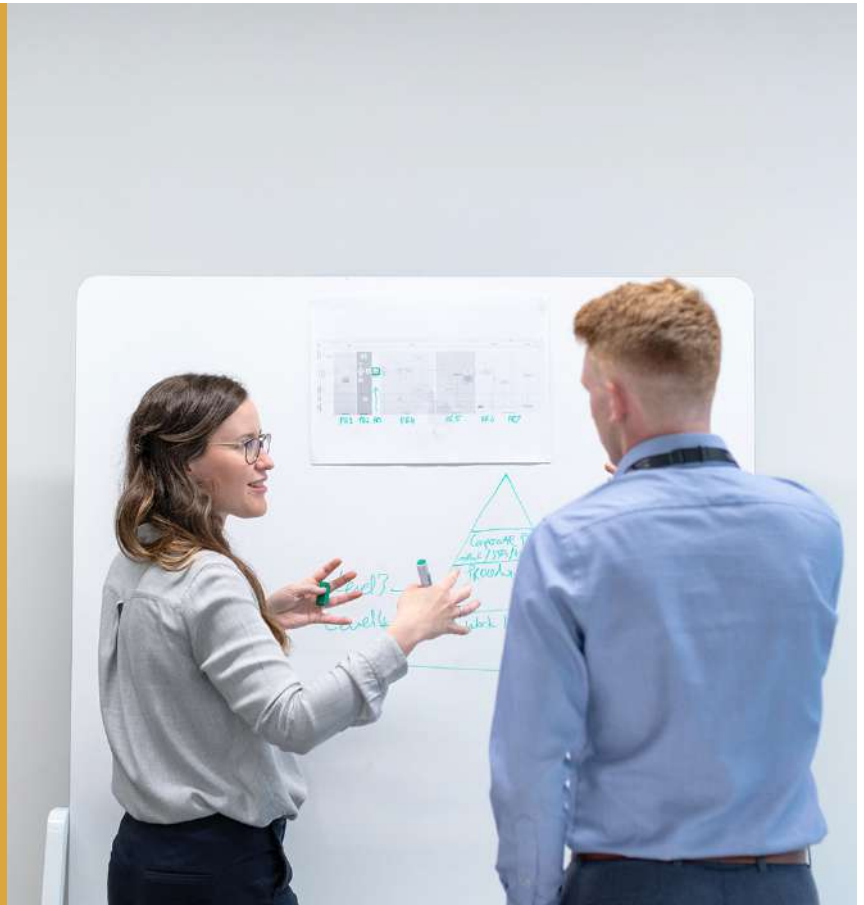

MISSION

To provide easily accessible, functional, Durable, Accurate, Rapid, Advanced and user-friendly Diagnostic kits of international standard at Reasonable and Affordable prices through continuous innovation and technology upgradation to individuals and Institutions.

VISION

To be a Well recognized brand providing affordable, accurate and Cost-efficient products to aid Healthcare and serve society at large.

OUR VALUES

The core values that drive us:

- 01 Quality Consciousness**

In the Diagnostic Kits or testing kits, quality matters a lot. We have highly equipped, efficient and committed team of Experts from the same industry. They have experience in Manufacturing & delivering best quality products. We do regular quality checkups through our dedicated AQ/AC team.
- 02 Safety & Accuracy**

We highly ensure that our product should be accurate and safe as it is a matter of healthcare. We follow all the concerned protocol properly.
- 03 Supply Chain Management**

We have a dedicated team to handle the supply chain for speedy & timely delivery of the products.
- 04 Transparency**

We Insure complete transparency in our company and products. We are compliant with ISO13458, ISO9001, CE, GMP, FDA, MSME, etc.
- 05 Customer Centric**

Our entire focus is to deliver good quality products to our respected customers and make them satisfy. We take feedback from our customers and act accordingly.
- 06 Innovation & Upgradation**

In the dynamic world we always try to adopt new ideas, concepts and do technical upgradation to add value to the product & services.

WHY SA-MEDLINE

Core Competencies

- 1 We have team of dedicated and experienced personnel who have expertise in the manufacturing of the Diagnostic kits.
- 2 World Class Infrastructure.
- 3 We have a dedicated team to manage the supply chain of the products for timely delivery.
- 4 Modern machinery and equipment for the production.
- 5 A dedicated R&D department.

OUR PRODUCTS

PREGNANCY TEST KIT

Prega Perfect Mini Pregnancy Rapid Test

- Rapid Qualitative Immunoassay for Detecting HCG in Human Samples
- Specimen type: only urine
- Simple test procedure and easy to interpret result
- Result interprets within 5 min and do not interpret after 10 min
- Sensitivity: 25 mIU/ml for urine sample
- Sensitivity: 100%
- Specificity: 100%
- Self-life 24 months at 2-30 °C

Prega Nice Big Pregnancy Rapid Test

- Rapid Qualitative Immunoassay for Detecting HCG in Human Samples
- Specimen type: only urine
- Simple test procedure and easy to interpret result
- Result interprets within 5 min and do not interpret after 10 min
- Sensitivity: 25 mIU/ml for urine sample
- Sensitivity: 100%
- Specificity: 100%
- Self-life 24 months at 2-30 °C

PREGNANCY TEST KIT

HCG Dipstick Rapid Test

- Rapid Qualitative Immunoassay for Detecting HCG in Human Samples
- Specimen type: only urine
- Simple test procedure and easy to interpret result
- Result interprets within 5 min and do not interpret after 10 min
- Sensitivity: 25 mIU/ml for urine sample
- Sensitivity: 100%
- Specificity: 100%
- Self-life 24 months at 2-30 °C

MEDILINE SA DENGUE TEST KIT

Dengue NS1 Antigen Rapid Test

- Detects NS1(acute infection) anti dengue virus
- Specimen type: Serum, Plasma
- Simple test procedure and easy to interpret result
- Result interprets within 15 min and do not interpret after 20 min
- No cross reaction to 17 common diseases, such as HIV, HCV, HBV, CHIK, Malaria, Typhoid
- Sensitivity: 100%
- Specificity: 100%
- Self-life 24 months at 2-30 °C

Dengue IgG/IgM Antibody Rapid Test

- Detects IgG (recent infection) and IgM (Previous infections) anti dengue virus
- Differentiates IgM Anti Dengue virus and dengue antigen
- Specimen type: Serum, Plasma
- Simple test procedure and easy to interpret result
- Result interprets within 15 min and do not interpret after 20 min
- No cross reaction to 17 common diseases, such as HIV, HCV, HBV, CHIK, Malaria, Typhoid
- Sensitivity: 99.1%
- Specificity: 100%
- Self-life 24 months at 2-30 °C

MEDILINE SA DENGUE TEST KIT

Dengue NS1+IgG/IgM Combo

- Duo test format minimize processing time
- Detects NS1(acute infection), IgG (recent infection) and IgM (Previous infections) anti dengue virus
- Differentiates IgM Anti Dengue virus and dengue antigen
- Specimen type: Serum, Plasma
- Simple test procedure and easy to interpret result
- Result interprets within 15 min and do not interpret after 20 min
- Sensitivity: 99.9%
- Specificity: 100%
- Self-life 24 months at 2-30 °C

MEDILINE SA MALARIA TEST KIT

Malaria Pf/pan Antigen Rapid Test

- Rapid qualitative detection of malaria *P. falciparum* specific histidine rich protein-2 (Pf HRP-2) and malaria pan lactate dehydrogenase (PAN-LDH) in human
- Malaria Pf/Pan ag can also discriminate *P. Falciparum* and *Vivax*, *P. Malariae*, *P. Ovale*
- Specimen type: only whole blood
- Simple test procedure and easy to interpret result
- Result interprets within 15 min and do not interpret after 20 min
- 50 µl whole blood sample contain 5 malaria parasites
- Sensitivity: 99.6%
- Specificity: 99.04%
- Self-life 24 months at 2-30 °C

MEDILINE SA MALARIA TEST KIT

Malaria Pf/Pv Antigen Rapid Test

- Rapid qualitative detection of malaria P. falciparum specific histidine rich protein-2 (Pf HRP-2) and malaria Pv lactate dehydrogenase (Pv-LDH) in human
- Malaria Pf/Pv Ag can also discriminate P. Falciparum and Vivax
- 50 ul whole blood sample contain 5 malaria parasites
- Specimen type: only whole blood
- Simple test procedure and easy to interpret result
- Result interprets within 15 min and do not interpret after 20 min
- Sensitivity: 99.6%
- Specificity: 99.04%
- Self-life 24 months at 2-30 °C

MEDILINE SA CHIKUNGUNYA & CARDIAC TEST KIT

Chikungunya IgG/IgM Rapid Test

- Qualitative detection of IgG/IgM Anti chikungunya virus
- Utilized recombinant antigen derived from the CHIK virus structural protein
- IgM/IgM immunoassay is the most practical lab method
- Distinguish from dengue infection which presents with similar symptoms
- Specimen type: Serum, Plasma, Whole blood
- Simple test procedure and easy to interpret result
- Result interprets within 15 min and do not interpret after 20 min
- Sensitivity: 96.1%
- Specificity: 99%
- Self-life 24 months at 2-30 °C

Cardiac Troponin I (cTnI) Rapid Test

- Qualitative detection of cardiac troponin I and its complexity at a level equal to or higher than 0.3 ng/ml
- Point of care test, suitable for emergency care
- Specimen type: Serum, Plasma, Whole blood
- Simple test procedure and easy to interpret result
- Result interprets within 15 min and do not interpret after 20 min
- Sensitivity: 0.3 ng/ml for serum/plasma, 1ng/ml for whole blood sample
- Sensitivity: 95.5%
- Specificity: 99.9%
- Self-life 24 months at 2-30 °C

MEDILINE SA TYPHOID IGG/IGM TEST KIT

Typhoid IgG/IgM Rapid Testt

- Detects Salmonella typhi (IgG)and Salmonella paratyphi (IgM), utilises O and H antigen from both
- Differentiates between IgG and IgM Antibodies
- Specimen type: Serum, Plasma
- Simple test procedure and easy to interpret result
- Result interprets within 15 min and do not interpret after 20 min
- Results are not affected by antibiotic treatment check in the culture method
- No hook effect was detected at concentration up to 10⁹ organism/ml
- Sensitivity: 92.4%
- Specificity: 97.3%
- Self-life 24 months at 2-30 °C

MEDILINE SA SCRUB TYPHUS & H. PYLORI ANTIBODY RAPID TEST

Scrub Typhus Ab Rapid Test

- Qualitative and differential test for the detection of antibody (IgG, IgM, IgA) to Orientia Tsutsugamushi
- Typhus fever are caused by orientia tsutsugamushi and transmitted by orthopods (e.g., Flea, Mite, Tick) bites scratching the bite open the skin to the bacteria, allowing them to enter the blood stream and within the blood stream the bacteria grow and replicate
- Specimen type: Serum, Plasma, Whole blood
- Simple test procedure and easy to interpret result
- Result interprets within 15 min and do not interpret after 20 min
- Sensitivity: 95.71%
- Specificity: 99%
- Self-life 24 months at 2-30 °C

H. Pylori Antibody Rapid Test

- H. Pylori is known to be a major cause of gastric ulcer, 90% of duodenal and 80% of gastric ulcers
- Detects IgG anti H. Pylori antibody
- Specimen type: Serum, Plasma
- Simple test procedure and easy to interpret result
- Result interprets within 15 min and do not interpret after 20 min
- Sensitivity: 94.6%
- Specificity: 100%
- Self-life 24 months at 2-30 °C

MEDILINE SA LEPTOSPIRA IGG/IGM RAPID TEST

Leptospira IgG/IgM Rapid Test

- Leptospira is an infectious disease caused by the bacteria *Leptospira interrogans*. It can lead to potentially fatal of kidney, Liver, Brain, Lungs and Heart. Both poor and affluent people are at risk for *Leptospira* infection
- Aids in the diagnosis status of acute infection, recuperation or previous exposure against *L. interrogans*
- Detects and differentiate IgG and IgM
- Specimen type: Serum, Plasma, Whole blood
- Simple test procedure and easy to interpret result
- Result interprets within 15 min and do not interpret after 20 min
- Sensitivity: 92.8%
- Specificity: 99.6%
- Self-life 24 months at 2-30 °C

MEDILINE SA FOB & TOXOPLASMA TEST KIT

One Step Fecal Occult Blood (FOB) Rapid Test

- Colorectal cancer is the third most common type of cancer in both men and women
- FOB test is the ideal method to screen for colorectal cancer as well as other gastrointestinal disease such as cancer polyps, colitis, diverticulitis
- No dietary restrictions
- Specimen type: only Feces
- Simple test procedure and easy to interpret result
- Result interprets within 15 min and do not interpret after 20 min
- 50 ng/ml hHB in buffer or 7ug/g hHB in feces
- Sensitivity: 97.8%
- Specificity: 99.3%
- Self-life 24 months at 2-30 °C

Toxoplasma IgG/IgM Rapid Test

- Rapid lateral flow chromatographic immunoassay test
- Differentiate between IgG and IgM anti Toxoplasma Gondii (T. Gondii)
- Specimen type: Serum, Plasma, Whole blood
- Simple test procedure and easy to interpret result
- Result interprets within 15 min and do not interpret after 20 min
- Sensitivity: 96%
- Specificity: 99%
- Self-life 24 months at 2-30 °C

MEDILINE SA FILARIASIS IGG/IGM RAPID TEST KIT

Filariasis IgG/IgM Rapid Test

- Filariasis is a parasitic disease caused by microscopic, thread like worms. These parasitic worms are transmitted by blood-feeding arthropods, mainly black flies and mosquitoes. This disease belongs to the group of diseases called helminthiasis
- Differentiates IgM and IgM Anti lymphatic filarial parasites (W. Bancrofti and B. Mylayi)
- Specimen type: Serum, Plasma, Whole Blood
- Simple test procedure and easy to interpret result
- Result interprets within 15 min and do not interpret after 20 min
- Sensitivity: 96%
- Specificity: 99.9%
- Self-life 24 months at 2-30 °C

MEDILINE SA HEPATITIS A VIRUS (HAV) TEST KIT

Hepatitis A virus (HAV) Rapid Test

- HAV is one of the most common forms of Hepatitis
- This highly contagious disease is spread through contaminated food and water
- HAV demographics infection affects all age groups
- Lifelong immunity against reinfection
- Specimen type: Serum, Plasma, whole blood
- Simple test procedure and easy to interpret result
- Result interprets within 15 min and do not interpret after 20 min
- Sensitivity: 90.5%
- Specificity: 97.7%
- Self-life 24 months at 2-30 °C

MEDILINE SA HEPATITIS E VIRUS (HEV) TEST KIT

Hepatitis E virus (HEV) Rapid Test

- HEV infection is more severe, resulting in a 1-2% death rate in adults
- This highly contagious disease is spread through contaminated food and water
- HEV demographics infection is most common in young adult aged 15-40 years
- People may become reinfected over the course of their lives
- Specimen type: Serum, Plasma, whole blood
- Simple test procedure and easy to interpret result
- Result interprets within 15 min and do not interpret after 20 min
- Sensitivity: 98.3%
- Specificity: 99.3%
- Self-life 24 months at 2-30 °C

MEDILINE SA URINE STRIPS 2P/4P TEST KIT

Urine Strip 2P Rapid Test

- The urine test strips contain solid phase reagents areas affixed to a plastic stick. They are provided as a dry reagent. Urine test strip provided test for the semi quantitative determination of glucose and protein
- The test result may provide information regarding the status of carbohydrates metabolism, kidney function, liver function and urinary infection
- Specimen type: Urine only
- Simple test procedure and easy to interpret result
- Result interprets within 1-2 min and do not interpret after 5 min
- Sensitivity: 100%
- Specificity: 100%
- Shelf life of 24 Months at 4-30°C and out of direct sunlight

Urine Strip 4P Rapid Test

- The urine test strips contain solid phase reagents areas affixed to a plastic stick. They are provided as a dry reagent. Urine test strip provided test for the semi quantitative determination of glucose, protein and pH
- The test result may provide information regarding the status of carbohydrates metabolism, kidney function, liver function and urinary infection
- Specimen type: Urine only
- Simple test procedure and easy to interpret result
- Result interprets within 1-2 min and do not interpret after 5 min
- Sensitivity: 100%
- Specificity: 100%
- Shelf life of 24 Months at 4-30°C and out of direct sunlight

MEDILINE SA URINE STRIPS 10P TEST KIT

Urine Strip 10P Rapid Test

- The urine test strips contain solid phase reagents areas affixed to a plastic stick. They are provided as a dry reagent. Urine test strip provided test for the semi quantitative determination of Leukocyte, Nitrite, Urobilinogen, Protein, pH, Blood, SG, Ketone, Bilirubin, Glucose
- The test result may provide information regarding the status of carbohydrates metabolism, kidney function, liver function and urinary infection
- Specimen type: Urine only
- Simple test procedure and easy to interpret result
- Result interprets within 1-2 min and do not interpret after 5 min
- Sensitivity: 100%
- Specificity: 100%
- Shelf life of 24 Months at 4-30°C and out of direct sunlight
